

DIAGNOSTIC EXPERTISE, DELIVERED FOR YOUR PET, BY YOUR VET.

When your pet isn't feeling their best, waiting for answers can be stressful. Mobile Animal CT (MACT) brings hospital-level CT imaging directly to your veterinarian's clinic so your pet gets advanced care without leaving the comfort of familiar surroundings.

- **Comfort & Safety** – Every scan is performed by two credentialed veterinary technicians trained in advanced imaging.
- **Fast Answers** – Board-certified veterinary radiologists provide expert results, usually within 1–2 days.
- **Less Stress, More Convenience** – No extra travel or unfamiliar clinics. Your pet stays with the veterinary team you already know and trust.

Serving Southern California and Arizona | mobileanimalct.com

WHEN CAN A CT HELP MY PET?

CT scans give your veterinarian a clearer picture of what's going on inside your pet. They are often used for the following conditions or symptoms:

- Chronic nasal or ear problems
- Eye and dental diseases
- Lung conditions or complex pneumonia
- Spinal or joint issues, fractures, or slipped discs (IVDD)
- Abdominal concerns like foreign objects, liver shunts, or masses
- Other complex cases where detailed images are needed
